Art Unit: 3653

#### **DETAILED ACTION**

# **Drawings**

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference signs mentioned in the description:

Figure 6; said figure fails to label processor "68."

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Specification

The disclosure is objected to because of the following informalities:

Page 3, line 17; the text of the specification describes the compartments 12 as "each hav[ing a] bottom floor". However, the lowest-most, central compartment has no such element (see Figure 1).

Page 5, lines 3, 4, 6 and 7; items 34A and 34B are not labeled in the drawings.

Appropriate correction is required.

Application/Control Number: 10/083,180

Art Unit: 3653

### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Said claims recite the limitation "programming means" in the first line of each claim. There are insufficient antecedent bases for these limitations in the claims. It appears that the Applicant intended for said claims to depend from claim 16 in lieu of claim 1.

### Allowable Subject Matter

Claims 1-16, 19 and 2- are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The Examiner considered Patent Number 4,993,591 by Schock (hereinafter Schock) to be the prior art most closely related to the Applicant's claimed invention. The box 8, drive motor 4, band 6 and opening 10 disclosed by Schock read on the Applicant's pill compartment, rotating means, retainer belt and discharge port, respectively. However, Schock fails to disclose of suggest a preprogrammed belt rotation actuated via the opening of a door compartment as claimed in the Applicant's independent claim 1. Furthermore, the Applicant's claims 2-20 depend from said independent claim, and thus, incorporate said limitation.

Conclusion

The following related art made of record and not relied upon is considered

pertinent to applicant's disclosure:

Patent Number US 6,223,934 B1 by Shoenfeld because of its belts 23,24,

Patent Number 6,076,670 by Yeranossian because of its coil spring 17a,

Patent Number 2,684, 781 by Allen et al because of its belts 4,12, and

Patent Number 761,351 by Beier because of its band C.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Mark J. Beauchaine whose telephone number is

(703)308-6336. The examiner can normally be reached on 8:00AM through 5:00PM

Mondays through Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Donald P. Walsh can be reached on (703)306-4173. The fax phone number

for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703)308-

1113.
